Berdakh Abibullaev, Ph.D.

Curriculum Vitae

Research Area

Neural Engineering: Brain-Computer/Machine Interfaces; EEG/ECoG/fNIRS Signal Processing; Electromagnetic Source Imaging;

Machine Learning: Kernel based learning, Neural Networks and Deep Learning, Support vector machines.

Education

02/2010 **Ph.D**, *Yeungnam University*, Department of Electronic Engineering, South Korea.
- *Research area* : Time-series prediction, Machine learning and Neural Networks;

08/2006 **M.Sc**, *Yeungnam University*, Department of Electronic Engineering, South Korea.
- *Research area*: Wavelet Analysis, Time-frequency localization; Physiological feature extraction;

07/2004 **B.Sc**, *Tashkent University of Information Technologies*, Uzbekistan.

Academic Work Experience

09/2015-present **Assistant Professor**, *Robotics & Mechatronics Department, School of Engineering and Digital Science, Nazarbayev University*, Nur-Sultan, Kazakhstan.

Teaching :
- Signals and Sensing with Laboratory (ROBT205)
- Statistical Methods and Machine Learning (ROBT407)
- Microcontrollers with Laboratory (ROBT206)
- Brain-Machine Interfaces (ROBT 613)

Research Focus:
- Deep learning algorithms for Brain-Computer/Machine Interfaces.
- Brain-Computer/Machine Interfaces in Neural-Rehabilitation after Stroke.
- Transfer learning applications in session/subject independent Brain-Computer/Machine Interfaces.
- High-Level Robotic Manipulator Control via Brain-Computer Interfaces for Assistive Applications

5/2018 - 7/2018 **Visiting Professor**, *Department of Electrical Engineering & Computer Science, University of Houston*, Houston, Texas, USA.
- Cortical source imaging of electroencephalographic signals in patients with stroke to examine neural correlates brain plasticity pre and post clinical trials with B.M.I. actuated exoskeleton.

5/2014 - 9/2015 **NIH Postdoctoral Research Fellow II**, *Department of Electrical Engineering & Computer Science, University of Houston*, Houston, Texas, USA.
- BMI-Exo Project: Brain-Machine Interface Control of a Therapeutic Exoskeleton for Neurorehabilitation.
  - Estimating neural correlates and mechanisms of an external command (mental intent) used to drive the external therapeutic exoskeleton for BMI.
- Neural Correlates of Infant Mirror Neuron System
  - Investigate the role the mirror neuron system plays in the motor learning of young infants via noninvasively acquired brain signals;
  - Categorizations of large-scale brain connectivity analysis to understand neural mechanisms of infant behavior.
- Electromagnetic-source localization and estimating brain network in connectivity analysis

01/2014-05/2014 **Research Scientist**, *Department of Neurology, Samsung Medical Center*, Seoul, South Korea.
- Investigated High-Frequency Oscillations of ECoG/EEG signals relevant to Epileptogenesis using machine learning algorithms. Supported medical doctors through brain data analysis in the presurgical evaluation of patients with refractory epilepsy.
- Neuroelectromagnetic source localization from scalp EEG & MEG recordings for delineation of epileptogenic zones in the surgical treatment of refractory focal epilepsy.

08/2013-12/2013 **Assistant Professor**, *Robotics & Mechatronics Department, School of Science and Technology, Nazarbayev University*, Astana, Kazakhstan.

Teaching: Enhancing Brain-Computer Interfaces by Machine Learning Techniques :
- Signals and Sensing with Laboratory (*a sophomore-level course*).

04/2011-08/2013 **Senior Research Scientist**, *Robotics Research Division, Daegu Gyeongbuk Institute of Science and Technology*, South Korea.

Development of rehabilitation strategies for stroke patients via robot-assisted physical therapy with BCIs.

- Implemented kernel-based machine learning algorithms for online BCIs to control neuro-rehabilitation devices.
- Examined inter-subject/session variabilities to enhance fNIRS-based BCI performances.
- Design and optimization of non-invasive based BCI paradigms for real-time robot control.

01/2010-04/2011 **Postdoctoral Research Scholar**, *Robotics Research Division, Daegu Gyeongbuk Institute of Science and Technology*, South Korea.

Brain-Computer Interfaces in therapy and diagnosis of Attention Deficit and Hyperactivity Disorders (ADHD).

- Involved in quantitative EEG and Neurofeedback methods of ADHD children. Time-frequency localization; Identification of strongly relevant neural signal patterns of ADHD using machine learning.
- Developed machine learning-based semi-supervised feature selection and classification algorithms.
- Participated in the developmental assessment of ADHD children during a long-term neuro-therapy in cooperation with a neurorehabilitation center at Daegu University.

Honors and Awards

11/2017 The Best paper award: *fNIRS motion artifact correction for overground walking using entropy-based unbalanced optode decision and wavelet regression neural network*," in Multisensor Fusion and Integration for Intelligent Systems, 2017 IEEE International Conference.

06/2014 The Best poster award on "*The evaluation of accuracy and clinical usefulness of 3D EEG source localization analysis*," Korean Epilepsy Congress 2014.

12/2012 The Best Researcher of the Year Award. Robotics Research Division, Daegu Gyeongbuk Institute of Science and Technology, Daegu, South Korea.

01/2011 Enlisted in Marquis Who's Who in the World 2011, 28th Edition, USA

09/2006 Awarded Korean Government Information Technology Scholarship for International Graduate Students for the Ph.D. program, South Korea.

09/2004 Awarded The Brain Korea #21 Scholarship for the MSc program.

09/2000 Privileged enrollment at Tashkent University of Information Technologies for the undergraduate program; Full tuition-waiver supported by the Government of Uzbekistan.

Technical Skills

Software skills.

Advaced skills in the Python Language and libraries such as Cython; good knowledge of C, C++. Experience with various tools and languages, including bash, LATEX, HTML, Git, and different database query languages.

Data Science.

Expert knowledge in NumPy, Scipy, Pandas, Sklearn, PyTorch Deep larning libraries

Neural data acquisition systems.

Extensive experience with Nicolet EEG Amplifiers, Blackrock Microsystems (intracranial recording), Functional Near-Infrared Spectroscopy FOIRE3000, BIOPAC fNIR200 Optical Brain Imaging, BioSemi Active-Two EEG system, Brain Products EEG amp., BIOPAC MP100 EEG amp. And G.tec g.USBamp systems.

Productivity applications.

TEX: [LATEX, BibTEX, PSTricks, Beamer].

System Environments.

Linux (Ubuntu, Pop_OS), Windows

Service to the Scientific Community

Associate Editor.

- IEEE Access Journal (Impact Factor: 3.7)
- PeerJ Computer Science (Impact Factor: 3.09)

Occasional Reviewer.

- IEEE Access Journal
- Neuroimage, Elsevier.
- IEEE Transactions on Neural Networks and Learning Systems
- Brain Research, Elsevier.

Program Committee Member and Session Chair.

- International Workshop on Artificial Intelligence for Healthcare Applications at International Conference on Pattern Recognition 2020.
- The 7th International Conference on New Trends in Information Science, Service Science and Data Mining, June 18-20, 2013, Jeju Island, South Korea.
- The 8th International Conference on Information Processing, Management, and Intelligent Information Technology, April 1-3, 2013, Seoul, South Korea.
- The 16th North-East Asia Symposium on Nano, Information Technology and Reliability, Oct.24-26, 2011, Macao.
- The 6th Int. Conference on Networked Computing, May 11-13, 2010, Gyeongju, South Korea.
- Int. Conference on Control Automation and Systems Oct.27-30, 2010, Seoul, South Korea.

Project Proposals, Participation & Coordination

01/2021 **Principal Investigator**, ***Brain-Machine Interfaces for Neural Rehabilitation after Stroke***, This project aims to accelerate the efficacy of robotic rehabilitation using a new neural interface system developed for upper-limb repair after stroke. It aims to facilitate expediate motor recovery from incomplete upper-limb paralysis and investigate in-depth understanding of cortical reorganization in the brain associated with the recovery..

01/2021 **Co-Investigator**, ***Classifier Validity and Its Applications in Bioinformatics***, The project studies the measures of classifier validity and explores their applications in bioinformatics. Nazarbayev University..

01/2019 **Co-Investigator**, ***Neural-assisted optimization of human learning with multimodal neuroimaging of EEG and NIRS***, Implementing and validate a neural-assisted, machine-learning-based intelligent tutoring system that uses information from physiological signals to adapt the learning schedule to a user's individual learning capacity..

09/2015 **Principal Investigator**, ***Development of a Brain-Computer Interface with a Robot and Functional-Electrical Stimulation for Upper-Limb Stroke Rehabilitation (BCI-ROBOFES)***, Evaluated by the committee of Oak Ridge Associated Universities (ORAU);.

9/2014 **Participant**, *Cognitive-Motor Development Research in Infants.*, Lead a team of Ph.D. students in exploring & decoding of the neural basis of *Imitation and Action Understanding* in freely-behaving infants via multimodal brain imaging techniques, University of Houston, Texas.

9/2014 **Participant**, ***The BMI-Exo Project: Facilitating Personalized Robotic Rehabilitation Of The Upper Limb, [NIH Grant R01NS081854-02, National Robotics Initiative]***, Lead a part of research that focuses on understanding neurophysiological correlates of motor learning during movements in stroke patients..

04/2014 **Participant**, ***Development of high-resolution subdural electrodes and data mining methods for precise localization of epileptogenic zone in treatment of patients with refractory epilepsy.***, Participated in idea generation and in drafting/writing of the project proposal at Samsung Medical Center, Korea.

[34] W.S. Kang, B. Abibullaev, S.H. Lee, and J. An. **Path planning algorithm using the values clustered by K-means.** In *the 15th Int. Symposium on Artificial Life and Robotics*, Japan, February 4-6, 2010.

[35] B. Abibullaev, H.D. Seo, W.S. Kang, and J. An. **A wavelet-based method for detecting and localizing epileptic neural spikes in EEG signals.** In *the 2nd Int. Conf. on Interaction Sciences: Information Technology, Culture, and Human. A.C.M.*, Seoul, Korea, Nov. 24- 26, 2009.

[36] B. Abibullaev and H.D. Seo. **Epileptic seizures detection using continuous time wavelet based neural networks.** In *the 6th International Conference on Information Technology: New Generations, IEEE Computer Society*, Las Vegas, Nevada, United States, April 27-29 2009.

Mentoriship

Current Students:

- Supervisor: Zhenis Otarbay, Ph.D. Student (1st year), Dissertation: "Design and Evaluation of Brain-Machine Interfaces for Upper-limb Stroke Rehabilitation"
- Co-Supervisor: Irina Fedorova, Ph.D. Student (3rd year), Supervisor: Prof. Amin Zollanvari, Dissertation: "Robust Data-driven Predictive Models for Brain-Computer Interface"
- Co-Supervisor: Inara Tusseyava, Ph.D. Student (3rd year), Supervisor: Prof. Matteo Rubagotti, Dissertation: "Perceived Safety in Human-Robot Interaction"
- Supervisor: Kuanysh Kudaibergenov, M.Sc. Student (2nd year), Thesis: "Subject to Subject Transfer Learning for BCIs using Transformers"
- Supervisor: Kulyan Karipbayeva, M.Sc. Student (2nd year), Thesis: "Non-Invasive BCIs for speech synthesis"
- Supervisor: Aigerim Keutayeva, M.Sc. Student (1st year), Thesis: "Robust Subject Independent BCIs using Attention Mechanism based CNNs"
- Co-Supervisor: Vladislav Mun, M.Sc. Student (2nd year), Co-Supervisor: Prof. Siamac Fazli, Thesis: "Explainable Deep Learning for BCIs "

Past Students:

- Supervisor: Alen Kabdislam, M.Sc. Student (June 2020), Thesis: "EEG Decoding and Classification using Deep Learning with Convolutional Neural Networks " (currently Senior Data Scientist at First Heartland Jusan Bank)
- Co-Supervisor: Mukhamet Nurpeiissov, M.Sc. Student (2nd year), Co-Supervisor: Prof. Tohid Alizadeh, Thesis: "Robot Learning and human-robot interaction framework based on programming by demonstration" (currently Data Scientist, Institute of Smart Systems and Artificial Intelligence, Nazarbayev University)
- Superved more than 14 undergraduate students formally through graduation projects or informally interested in working with me. Most of these supervised projects led to the 13 different publications either in journals and conferences in the field of Brain-Computer Interfaces
